Calling Cards—\$4.00 for 500; \$6.00 for 1,000
Posters, according to the type set, will average about 10 cents per square.

Entered at the Postoffice at Ely, Nevada, as second-class matter.
Communications are solicited, but the paper will not be responsible for the opinions of its correspondents.

LOCAL AND OTHER HAPPENINGS.

Mrs. J. B. Simpson entertained the Ladies' Card Club Saturday.

The latest metal quotations are: Silver, 54 1/2; Lead \$4.30; Copper \$13.00.

Quite a large crowd attended Senator Hamden's show here Tuesday evening.

Mrs. A. McDonald and son, Walter, returned from Cherry Creek Saturday.

The first apples of the season were brought in from Snake Valley Monday.

A good many of our miners are practicing up for the drilling match on Labor Day.

Miss Laura Gallagher spent several days in town this week interviewing Dr. Hamilton, the dentist.

The Ely Social Club will give another dance in the hall, tomorrow evening, Friday, August 21.

Mr. Duncan McDonald, an old-time resident of Taylor this country, came in from San Francisco Tuesday.

H. A. Comins returned Tuesday from Eureka, where he accompanied Jas. B. Orr by private conveyance.

Angus Holmes, who has been attending school in Reno and San Francisco for the past three years, returned here Thursday.

B. F. Miller, general manager of the Utah & Nevada Express Co., came in from Eureka Saturday and slid out again Monday morning.

Jas. B. Orr, whose health has been very poor for several months past, departed Friday for California in search of a more healthful climate.

News came from Osceola last evening that Jas. H. Marriot has purchased the entire interest of J. A. Scott in the store and restaurant in that town.

Pat and Neil Bonner, sons of Mrs. P. Bonner of Eureka, Utah, who have spent the past three months here visiting with Mrs. Jas. Baird, left Thursday for their home.

"Doing the West" is said to be becoming fashionable among the rich Easterners. Of course, the West will be somewhat interested in the manner in which the doing is done.

Miss Johanna Rierdan arrived from San Francisco Saturday enroute to her home at White River, White Pine county where she was called on account of the serious illness of a brother, Sentinel.

Louis and Fred Franks pulled out Friday evening for southern Lincoln county, where they go to more fully prospect some mining locations they own in that section, which is very near the line of the San Pedro & Los Angeles railroad.

Geo. F. Mezger left here Monday morning for St. George, Utah, where he will accept a position with Fred Butler, who formerly had charge of the Chainman mine here, but is now manager of a copper mine and smelter near that place.

Either by accident or design some middlemen person, who thought it a great joke, shut off the water in the upper ditch Tuesday evening, leaving the power house a little dry on juice, and the entire town in darkness for nearly an hour.

Jas. Reilly and Chas. Karbstein came over from Cherry Creek Thursday on business. The latter young man has recovered sufficiently from the injuries he sustained by an accident in the Star mine last winter, to be able to get around fairly well with the aid of a cane.

The Automobile will probably hereafter make only special runs to the railroad, it being too light a machine for the regular trips. It has however

thoroughly demonstrated that only heavier machines, properly protected from the dust, are required to make the enterprise a perfect success.

Mrs. H. E. Freudenthal and Miss Ada Thompson left Friday morning for California for their health. Since Mrs. Freudenthal's return in June her health has been failing and a trip to the Coast where the altitude is not so great as it is here will be beneficial to her as she improved very much while here last Winter. She does not expect to return for some time.—Pioche Record.

John W. Bucher and Miss Marie Sauter, both of Denver, were married in Elko on August 5th, says the Wells Herald. Mr. Bucher occupied the position of assayer for the New York & Nevada Copper Co. while here, and resided for several months past at Copper Flat with his supposed-to-be wife. This news comes as a sort of a surprise to many of our people, who thought that Mrs. ——— was about the "stuff." Wouldn't it jar you?

MINE SAMPLINGS.

At the White Pine Copper Co.'s, Ruth group, drifting on the 300 and 500 levels still continues in the same character of ore.

The McKinley Company is pushing developments in the drifts on the 200 and 300 levels of the Saxton, and continuing the sinking of the shaft on the Jupiter group.

The New York & Nevada Copper Company at Copper Flat, is kept busy these days in freeing the shafts of water, a large inflow of which was recently encountered in the No. 2 shaft.

ELY SCHOOL WILL OPEN MONDAY SEPTEMBER 14.

Both Teachers Are Chosen.

The School Trustees, Messrs. McDonald, Parker and McKernan, announce that the Fall term of the Ely school will open Monday, September 14.

A. J. Cartwright will have charge of the Grammar department and Miss Jennie Carothers will have charge of instructing the younger children.

TO LEACH CHAINMAN TAILINGS

Plant Will Be Erected in Town For That Purpose.

Mr. Edward Malard and son, who arrived here two months ago from Los Angeles, Cal., via Tonopah, and who have since been making thorough tests of all the tailing piles of the county, have just closed an agreement with the directors of Chainman Mining & Electric Company whereby they come into possession of the old tailings of the company lying in the west end of town. It is the intention of Messrs. Malard to immediately erect a small reduction plant on the property and commence the extraction of the gold values by the cyanide process, with which, after numerous trial tests, they have proven these tailings to contain values in paying quantities.

Both these gentlemen have had many years practical experience in the treatment of ores in many of the California mining camps, and that they thoroughly understand their business is evidenced by the careful and thorough manner in which they have gone about their work. They will undoubtedly succeed in making considerable money out of these tailings after many of the so-called Eastern professors and experts have condemned them as valueless.

The gentlemen will find in Ely many other good gold prospects, the owners of which would gladly contribute a ton or two of ore to them for experimental purposes at any time, and all of whom wish them success in this enterprise.

ANOTHER MINT SUIT BEGUN.

Acting under instructions from the solicitor of the Treasury, United States District Attorney Summerfield has begun a second suit in the former Governor Adams matter. He is suing the heirs of Evan Williams, Jacob Kline, and Robt. P. Keating, Mr. Adams' bondsmen, for \$74,549.75.—Journal.

The General Land Office at Washington has issued a peremptory order providing for the tearing down of the fences of stockmen who have illegally strung their wires across the public domain, and for the throwing of such lands open to the public. Any further evasion of the law will bring the offender before the federal Courts. It is stated that the law will be enforced by the government officials to the very letter.

Dissolution of Partnership

We, the undersigned, have this day mutually agreed to dissolve partnership in the business of General Merchandise carried on by us under the name of Olson Bros., Hans Olson retiring from said business. In the future the business will be conducted by Andrew Olson who will collect all bills or accounts due the firm and pay all the indebtedness of the said firm.

ANDREW OLSON.
HANS OLSON.

THE GIROUX CONSOLIDATED COMPANY.

GOOD ORE IN THE MORRIS BELOW THE 200-LEVEL.

NEW DRIFT STARTED FROM 450-LEVEL OF GIROUX SHAFT.

NEW DOUBLE COMPARTMENT SHAFT COMMENCED THIS WEEK.

Joseph L. Giroux Resigns Position of General Manager of United Verde Mines

To Personally Take Charge of Operations Here.

Says We Have Biggest Copper Mines in the World.

It is with a source of gratification that we note the disclosures and operations of the Giroux Consolidated Mines Company this week, and also to know that a man who has probably taken from mother earth as great an amount of wealth as any other living person has gone on record as believing that he has, comprehended within the Giroux Mines the making of one of the greatest copper producing properties that he ever had any experience with, an opinion that is shared by nine-tenths of the people in this community who have any knowledge whatever of mining.

It is unnecessary for us to make any exaggerated statements or misrepresent the mines in any respect as there can be doubt of their merits being fully exploited with such a man as Joseph L. Giroux directing their operations. That he will not make a mistake in fulfilling his predictions of the merits of these properties is evidenced by the fact that not one single failure, in all his years of practical and active mining, has yet been held against his management of any mining proposition, and the present developments in the property not only fully justify every prediction that he has made but are actually bringing about a realization of them.

Associated with Mr. Giroux in the local management of the properties are two of the most practical, competent and efficient mining men in the State, both of whom are thoroughly familiar with the characteristics of the ore bodies in the districts, which in itself is very useful and important information to possess in connection with the development of the mines.

The holdings of the Giroux Consolidated Mines Company in this district comprise forty-four locations, covering 6,000 feet of continuous copper outcroppings, varying in width from 300 to 600 feet, upon which work is now being prosecuted at several points. The most prominent being executed at the Giroux shaft, on the Old Glory claim, and on the Morris mine, both places now presenting an excellent showing. In sinking the latter shaft below the 200-foot level this week, a large volume of water was encountered necessitating the installation of another pump which is now having no difficulty in handling the water. Underlying this water strata is what now appears to be a very large body of good ore, consisting of chalcopryite, chalcocite and peacock copper. When this shaft has reached the 300 level, which the management expect will be accomplished early next month, drifting from this level will begin for the purpose of still further developing the large bodies of chalcopryite now exposed on the 200-level by 900 feet of drifts. If the developments on the next level demonstrate the ore bodies to be as large and of as good a grade as they are on the upper level, and they will be better—the Morris alone will have enough ore is sight to justify the erection of reduction works, the work upon which will probably be begun at an early date, unless Mr. Giroux with his usual conservatism, should insist upon still further developing the property before the commencement of such an undertaking.

At the 450 level of the Giroux shaft another new drift is now being driven forward with Lyner air drills. This drift will cross-cut the enormous ore vein and also serve as a drain tunnel to connect the other workings with the new double-compartment shaft, which is situated on the Alpha claim and located about 1500 feet west of the Giroux shaft. The new shaft, upon which work is now progressing, is the probable point where the main work will ultimately be centralized in order to handle the ores in a systematic and economical manner. Lying as it does some hundred feet below the collar of the other two shafts, in which a great amount of water has been encountered, it will be driven down to a depth sufficient to drain all the surrounding country of its surplus water, and from its lower level numerous drifts and cross-cuts will perforate the neighboring territory for hundreds of feet, thereby enabling work to be carried on in the various levels of the other

mines with greater ease and rapidly when once they are freed of that troublesome factor—water.

While the Morris and Old Glory are now practically developed mines, having been worked in a systematic manner for the past two years, there are still many other fascinating and promising surface showings on the outside claims, upon which very little work has been done, but which in our estimation will prove of surpassing value when developed, and they will without doubt receive Mr. Giroux's prompt attention when he comes to personally supervise the work here. In this connection we might state that the Taylor mine, which has been neglected for sometime, will render a very good account of itself when called upon, as there is now sunk on this claim an incline shaft to a depth of 150 feet, the entire distance showing a uniform four foot vein, returning a general average assay value of 11 per cent. copper, \$7 in gold and 2 ozs in silver. But this is but an infinitesimal seam when compared to the giant veins upon which the greater amount of the work is now being performed. However, there are a great many tons of ore and thousands of dollars to be produced from this vein alone.

Some idea of the extent and magnitude of the Giroux properties can be gained from the fact that the management regard this excellent showing on the Taylor as a mere side issue.

We can truthfully state after having made a tour and examination of the entire property that it presents one of the greatest possibilities of any mining enterprise in the United States today, and believe that the successful development of these mines will be the crowning work of Mr. Giroux's mining career, which is saying a great deal when it is taken into consideration that he has been very prominently identified with the developments of some of the greatest copper mines in the country; notably among which are the following mines of the Amalgamated Copper Co. of Butte, Mont.: The High Ore mine, the Diamond mine, Clark's Colusa, Ramsell's Parrott and the Colusa Parrott mines. For the past fifteen years he has been general manager of the United Verde Copper Mines at Jerome, Arizona—the mines that have made Senator W. A. Clark one of the wealthiest men in all the world.

To show the sincerity of Mr. Giroux's belief in the merits and possibilities of these mines we herewith append the following letter, in which he accepts the management of them:

"MESSRS. HURD, HAERTHER & CO., PHILADELPHIA, PA.

GENTLEMEN:

"I beg to inform you that I have accepted the office of President and General Manager of the Giroux Consolidated Mines Company, operating at Ely, Nevada, and that I am personally interested in said properties as shown by my letters and reports which I have previously furnished you, and that it is my intention to give my personal attendance and supervision to the affairs of said corporation, and to the operation and development of its mines.

"As you are aware, for the past 15 years I have had charge of the management of the United Verde Mines of Arizona owned by Hon. Wm. A. Clark U. S. Senator of Montana, and in severing my connection with that Company, I do so with the knowledge that I am identifying myself with the greatest mine in the world when developed along the lines proposed by the Giroux Consolidated Mines Company.

Very truly yours,
JOSEPH L. GIROUX."

CHERRY CREEK ITEMS.

(By our Regular Correspondent.)

A. C. House, County Assessor, was a visitor this week.

K. C. Davis, the lumberman, left on Tuesday to look after business matters in Muncie.

Mrs. C. R. Reeves came on from the railroad by stage and remained over a day or two.

Mr. Levy, the pleasant San Francisco drummer, dropped in this week and was well received.

K. C. Davis drove over from Ely on Sunday to get some orders for timbers and he got them.

The Glasgow & Western, Old Imperial and Wide West mining company's had their paydays last week.

John Eager and wife arrived from Ely accompanied by Miss Katie Eager who returns to Salt Lake City.

All the P. & A. M. in town attended in a body the funeral of the daughter of Chas. F. Phalan on Friday.

Hans Olson, having disposed of his business here, will leave with his family this week to seek new fields. They will visit friends in DeLamar and Pioche next week.

Mrs. Bowman and family have arrived from the railroad, and will probably remain with the husband and father, and become permanent residents.

dents. A valuable acquisition

Mr. and Mrs. F. A. McDermid, Miss Amy McDermid, Mrs. and Miss Lewis and Master and Miss Stainer returned to the ranch at Cloverdale on Saturday after a most delightful visit among friends in Ely and Cherry Creek—so they say.

Hans Olson has sold his saloon building and business to James Reilly and Charles Karbstein. The transfer was made last week. Mr. Olson has also sold his interest in the general store to his brother Andy who will continue the business.

George E. McMurray, a miner from Cripple Creek, Colo., has been here several days looking over the gold district with a view to leasing and bonding. It is probable he will come to an agreement with the owners of the Little Johnny mine in Cocomaogo.

Owing to loss of time of some of the mechanics the completion of the Wide West mill has been delayed, and as is generally the case in building a mill so far from the base of supplies, something very trifling in itself but of importance in completing the machinery is wanting. However before many days this mill will be heard from as a producer of gold bricks. Contractors are at work grading a road to the mine so that ore can be hauled to the mill at a low figure.

The burial of the eldest child of Mr. and Mrs. Charles F. Phalan on Friday at 4 P. M. brought together very many of the neighboring ranchers and others who attended out of respect and to show their sorrow for the bereaved parents. Charley was born and raised among us and has many friends who grieve with him in his grief. Supt. Leishman although a stranger among us caused work at his mine and mill to be suspended half a day to enable the employees to attend the funeral. Messrs. Pascoe, Morris, Sundberg and Leishman and Mesdames Kelsey and Thomas sang appropriate hymns at the grave. Religious services were conducted by John Wearne. Geo. F. Parker was the undertaker. The deceased child, Hazel May Phalan was born in Cherry Creek somewhat less than three years ago.

CARD OF THANKS.

Mr. and Mrs. Chas. F. Phalan desire to thank very sincerely their friends and neighbors who rendered them aid and sympathy during their recent affliction.
